# PowerBrute™

## Best Hydraulic Universal Thumb

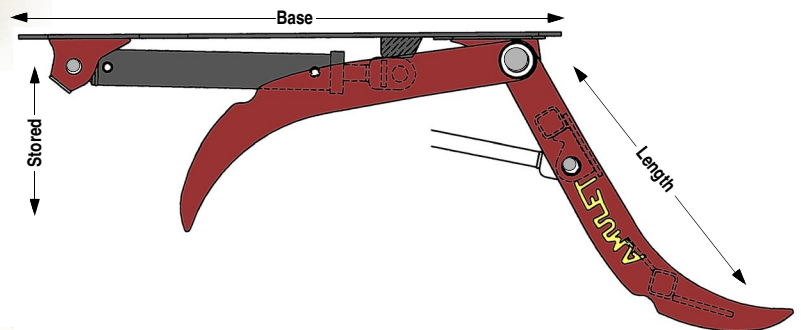

Today's competitive market forces you to adapt your work style and equipment to meet tomorrow's jobs. Your backhoe or excavator must also evolve: a bucket on this job, a breaker on the next. The Amulet **PowerBrute** simplifies changing these tools, while giving you the versatility of a hydraulic thumb.

### FEATURES

- Remote main-pin means it works great with all Buckets & Quick Couplers, makes changing buckets & other attachments a breeze... no need to remove thumb!
- Thumb can be curled independent of bucket (demolition, rock placement, land clearing, etc).
- When not in use the **PowerBrute** is hydraulically stored tight against dipper stick.
- **EASY INSTALLATION!**

**Amulet Offers Seven Different Models** in the **PowerBrute** series. Each model is designed to cover a specific segment of machines that range between 2,500 - 100,000 lbs.. Contact the factory for specific **PowerBrute** models and specifications (see below) toll free at 1-800-526-8538. Your dealer can quote the model best suited for your particular loader/backhoe, mini or full size excavator.

Full length base plate on most models includes mount stop and remote main hinge pin. **Easy installation**

### • HEAVY DUTY •

- Made with **high strength alloy** which maximizes performance and minimizes extra weight to dipper stick.
  - **Open back design** offers improved visibility.
- Large diameter **hardened pins and bushings** throughout.
- **Grease zerks** on main pin and hydraulic cylinder.
