TiltBucket^G

Ultimate Grading and Shaping Tool

Amulet Hydraulic Tilt Buckets.

The Amulet Tilt Bucket is fast becoming standard equipment for many excavator operators. Our innovative and superior design incorporates every feature possible, culminating in the ultimate shaping tool.

Features and benefits of Amulet Tilt Buckets:

- Buckets tilt 45 degrees each way giving a full 90 degree range of tilt.
- Standard side taper allows for bucket clearance through crowd action.
- Heavy duty double-acting hydraulic cylinders are fully guarded.
- Induction hardened pivot pins mounted through large bushed surfaces maximize wearability.
- Cylinder rod ends are bushed for ease of maintenance.
- Hydraulic hose guides are provided for short hose protection.
- Twin cylinders come complete with bucket hose kit.
- Wear strips are fitted as standard features for extended bucket life.
- Bolt-on cutting edges can be fitted as an option increasing life of the base edge.
- Optional abrasion resistant side cutters and heavy duty cutting edge increases bucket rigidity, durability and wear.

**Perfect for
V-Ditching &
Sloping**
